

TP-LINK's N600 Entertainment Adapter Promises to Make Your Wired Devices - Wireless

New Universal Wireless Dual Band Entertainment Adapter can be used to bring all of your home's Internet-enabled devices into the wireless world

(Las Vegas, Nevada) – January 9, 2013 – TP-LINK, a global provider of networking products, today announced its new N600 Universal Wireless Dual Band Entertainment Adapter with 4 ports, the TL-WA3164EA designed to bring all of your home or office's Internet-enabled devices into the world of wireless. With N600 dual band speeds of 300Mbps at 2.4GHz and an additional 300Mbps at 5GHz, those devices in your home that previously required running Ethernet cables around furniture, through walls and doorways can now be connected to your network wireless, without the risk of degrading performance.

With a total of four Gigabit LAN ports, you have ample space and bandwidth to connect Internet-enabled TVs, Set-top boxes, games consoles, DVD and media players directly to your Wi-Fi network and get rid of all of the cable-clutter currently burdening your living room. The TL-WA3164EA is also universally compatible with all Internet-enabled devices, so if it has an Ethernet port, you can make it wireless in a flash.

With domain name-based login, the adapter also does away with complicated setups and allows you to easily access your device and control your connected devices' wireless settings simply by typing in an easy-to-remember URL.

TP-LINK's N600 Universal Wireless Dual Band Entertainment Adapter will be shown at CES from January 8-11, 2013 Las Vegas Convention Center South Hall 4-Upper Level, Booth 36212

Estimated Product Availability: Q2 2013

Features

- Universally compatible - works with any device with an Ethernet port
- 300Mbps wireless speed over the 5GHz and 2.4GHz bands, ideal for smooth HD video and music streaming and online gaming
- Connect Ethernet-enabled devices (TVs and Game Consoles) to your existing home network and the Internet
- Works seamlessly with all 802.11b/g/n devices
- Easy wireless security encryption at a push of the WPS button
- Supports domain name-based login, (<http://tplinkadapter.net>) for a simpler setup experience
- CD-less installation

Specifications

Standards and Protocols	IEEE 802.11b, IEEE 802.11g, IEEE 802.11n
Interface	4* 10/100/1000Mbps LAN Ports 1 *mini USB 2.0 Port (for power supply)
Button	WPS Button, Reset Button
Antenna	Internal
External Power Supply	5VDC / 1A
Frequency	2.4GHz or 5GHz
Signal Rate	5GHz: Up to 300Mbps 2.4GHz: Up to 300Mbps
Operation mode	Client

About TP-LINK

TP-LINK is a global provider of SOHO and SMB networking products and is the world's number one provider of WLAN and Broadband CPE devices. Our products are available in over 120 countries to tens of millions of customers. Committed to intensive R&D, efficient production and strict quality management, TP-LINK continues to provide award-winning networking products in Wireless, ADSL, Routers, Switches, IP Cameras, Powerline Adapters, Print Servers, Media Converters and Network Adapters for global end-users.
