TP-LINK Wall Socket-Mounting Wireless Range Extender Conveniently Expands Networks

With 300Mbps wireless N speeds, Range Extender button and integrated plug, extending a wireless network has never been easier

(Las Vegas, Nevada) – January 10, 2013 - TP-LINK, a global provider of networking products, today announced its new Power socket-mounted 300Mbps Universal wireless N range extender. The sleek new device is designed to conveniently extend the coverage and improve the signal strength of an existing wireless network to eliminate "dead zones". Combined, leading wireless N technologies, superior security and wider compatibility make the TL-WA850RE a secure, high-speed solution that can help users maintain an existing wireless network and vastly improve the network's coverage, providing the freedom to enjoy Internet anywhere in large areas such as homes, hotels or small offices, without worrying about coverage limits.

Being incredibly user friendly, the TL-WA850RE is ideal for large homes or offices for experienced or novice users. Users can quickly deploy the device, with no new wires or cables, within range of their existing wireless network, press the 'range extender' button and instantly expand their total wireless coverage to previously unreachable locations, eliminating troublesome 'dead zones'.

The TL-WA850RE will be shown at CES from January 8-11, 2013 Las Vegas Convention Center South Hall 4-Upper Level, Booth 36212

Estimated Product Availability: Q2 2013

Features

- Supports domain name-based login for a more user-friendly setup experience
- CD-less installation
- Easily extend wireless coverage at a push of the Range Extender button
- Profile function helps users remember previously paired wireless networks

- 300Mbps wireless speed ideal for smooth HD video, music streaming and online gaming
- Works seamlessly with all 802.11b/g/n devices

Specifications

Interface	1*10/100Mbps Ethernet Ports
Button	Range extender, Reset
External Power Supply	9VDC / 0.6A
Wireless Standards	IEEE 802.11n, IEEE 802.11g, IEEE 802.11b
Antenna	Internal
LED	Power, wireless, RE, Ethernet, 5*signal
Wireless Rate	300Mbps
Frequency	2.4GHz

About TP-LINK

TP-LINK is a global provider of SOHO and SMB networking products and is the world's number one provider of WLAN and Broadband CPE devices. Our products are available in over 120 countries to tens of millions of customers. Committed to intensive R&D, efficient production and strict quality management, TP-LINK continues to provide award-winning networking products in Wireless, ADSL, Routers, Switches, IP Cameras, Powerline Adapters, Print Servers, Media Converters and Network Adapters for global end-users.
